

## **Wizard of Oz Prototyping – Mid Fidelity**

### **Task 1 – See how your spendings evolved in the last few months.**

#### **User 1:**

- Finished the task quickly
- Asked whether that all we can see

#### **User 2:**

- Was confused on whether he already had finished the task or no due to the low amount of detail about their spendings

#### **User 3:**

- Went to a different section before finally arriving at the spendings section and finish the task.

### **Task 2 – Complete the first lesson of finance basics.**

#### **User 1:**

- Had no problems

#### **User 2:**

- Didn't know if he had already finished the lesson or not, despite make everything correctly "in our eyes"

#### **User 3:**

- Finished the task with ease

### **Task 3 – Simulate and investment in bitcoin.**

#### **User 1:**

- Suggested adding an option to confirm the operation in case the user misinputs something

#### **User 2:**

- Didn't have any problems

#### **User 3:**

- Was a bit confused on how much he "invested", suggested that we made that more clear
